**NEVER SEEN BEFORE** IN  
THE SECURITY BUSINESS

DRY-MIX MORTAR  
AS **AN ADDITIVE**

Today you are defining your design by working with armoring, thickness of wall and quality of fibers. Maybe you add fibers to your mortar, but now you get a new opportunity with the new Secutec Concentrate - add extra strength to your local mortar. In this way, Contec can help you to maximize your business. E.g. add 40% Secutec Concentrate and achieve 140 N/mm<sup>2</sup> or add Bauxite to this mix and you will meet the 180 N/mm<sup>2</sup> level. You can also choose to add e.g. 20 % Secutec Concentrate and achieve a strength of 120 N/mm<sup>2</sup>. The choice is yours. Is the goal to achieve some of the highest standards try our standard Secutec S9 mix with bauxite, where we can offer you more than 260 N/mm<sup>2</sup>.

Effect of adding Secutec Concentrate to your local mix and aggregates. The results show that by adding e.g. a strong aggregate as Bauxite, you are able to increase the strength by another app. 30%. Values and effects are estimated and depending on quality of local aggregates.

# FIRST NEW CONCRETE PRODUCT IN THE SAFETY BUSINESS FOR MORE THAN 25 YEARS

After more than 25 years in the security business, supplying many of the important manufacturers in Europe with ultra-high performance mortar, Contec is launching both a new product and a new supply concept with a high potential to improve your bottom line and/or bring you more business.

## NEW SECUTEC CONCENTRATE

The new Secutec Concentrate gives you the opportunity to mix and strengthen your mortar for your safes and other safety products to the strength you want. Add from 5% to 40% of the new Secutec Concentrate to your mortar, and achieve the specific strength you need for your products. See relationship between strength and added Secutec Concentrate on the opposite side. This could easily mean that you will use one strength for one product and other strengths for other products.

**3 SUPPLY OPTIONS WITH CONTEC**  
As the only supplier, Contec is able to offer you our new Secutec concentrate that allows you to add a maximum of local cements and aggregates. If you want to achieve some of the highest strengths in the business and you still want to have the opportunity to save money by working with local sand or granite, Secutec Binder is the choice. If the goal is to achieve the absolute highest Resistance Units or beat competition, we offer you to work with our Secutec Ready-Mix Grout that contains ingredients of the highest quality.

# WORK WITH LOCAL AGGREGATES AND GET GLOBAL BUSINESS

## NEW SUPPLY CONCEPT

For the first time it is possible to buy a dry-mix mortar that works with your local cement and aggregates, and with Contec Secutec products, you can choose the way of supply that fits right into your production philosophy:

- **Concentrate:** Choose our new Secutec Concentrate if you want to source cement and aggregates locally.
- **Binder:** Choose Secutec Binder if you prefer our high quality binder and want to add local sand and other aggregates.
- **Secutec Grout:** If you want probably the best ready-mix on the market with high quality cement, fibers, granite etc., in a proven and tested quality, Contec is able to supply you with Secutec Grout.

## ENTER NEW MARKETS

Markets around the world have different requirements and standards. With Secutec Concentrate, we can help you to develop new products and meet the new standards. Benefits from choosing Secutec Concentrate as a variable in your mortar:

- Reduce versions in product range
- Reduce amount of steel or sub-supplies
- Reduce cost by using local aggregates
- Lower cost of transportation
- Improve your green profile

# PROBABLY THE ONLY **CONCRETE LAB** IN EUROPE FOR THE SECURITY BUSINESS

While other suppliers contract, Contec in Denmark has chosen to expand. For Contec testing is not only test of quality - it is also to help our customers to new solutions.

As one of the only suppliers of high strength mortar in the Security Business with own laboratory and many years of experience with dry mixes for ATM', safes and vaults, Contec offers to help you in optimizing your recipes and achieve approvals in various safety classes. In close cooperation with our customers and with involvement in tests at VdS, Contec is able to give consultancy that will either bring you to a higher level of safety classes, higher quality or help you into new markets.

Lab manager

# HOW YOU GET STARTED

## ... AND BECOME FIRST MOVER

The process of getting started is simple and free of charge.

After our first contact, Contec will send you 100 kg of Secutec Concentrate for your internal test. With this, you make your initial tests with e.g. 10-20-40% addition of Secutec Concentrate to your own mix. At the same time, you send Contec samples of the local aggregates you use today for tests here at Contec. Based on analyses of the properties and various lab-tests, Contec will then suggest you one or more options and recipes, which are optimized to your aggregates.

**Cost:** So far nothing....

**Time:** Approximately 3 months.

**Meetings:** Can be arranged at your facility.

## CONTACT CONTEC

Send us an email or give us a call, if you feel Contec Secutec Concentrate could be a product for your organization.

# CONTEC IN THE SECURITY BUSINESS

Through constant focus on developing new weight, dimension and cost effective solutions Contec has gained its position in the security industry. As a result, we have been given the tough VdS approval on our designed barriers, which has a very high degree of resistance towards most of the burglars' tools. As the only European manufacturer, Contec has achieved an approval on 40 mm thin ATM's in EC Class 3, 4 and 5 and we have taken a patent on an armored construction, - now used by many companies in the European Security business.

## CONTEC CONSULTANCY

Building up a safety product for a safety class requires more than knowledge about concrete mortar and steel constructions. At Contec, we offer our expertise in armoring from our activities in road constructions, architectural buildings and thousands of square kilometers of industrial floors and special solutions.
